

Encore Image replaced the tired, outdated monochrome electronic message sign at the Santa Fe Springs Town Center in Southern California. The center now proudly displays their messages on a 16mm full-color digital display.

Encore Image creates custom signs and sign structure elements. We have a long history of producing superior sign systems. It is our mission to work with discerning clients to help them design, build, install and maintain their signs. We pride ourselves in providing complete project management. Our turn-key program can accomplish each phase of your sign project:

**Planning • Design • Engineering • Permitting • Manufacture • Installation**

We updated the Santa Fe Town Center sign and we can do the same for you. Please call us.
